1.3. 7207-0094 Electronic Unit Injector Nozzle Nut Parameter

Adaptation System: Common Rail System

Electronic Unit Injector Nozzle Nut Series: E3 Series

Electronic Unit Injector Nozzle Nut Type: Electromagnetic

Electronic Unit Injector Nozzle Nut Detailed Dimensions: $\Phi 39 \times 90.8 \times M34 \times 1$

1.4. 7207-0094 Electronic Unit Injector Nozzle Nut Specifications and Dimensions

Electronic Unit Injector Nozzle Nut Size: 14cm* 5cm*5cm

Electronic Unit Injector Nozzle Nut Net Weight: 150g

Electronic Unit Injector Nozzle Nut Gross Weight: 200g

Electronic Unit Injector Nozzle Nut Quality: China Made New

Electronic Unit Injector Nozzle Nut Package Size: 17cm* 8cm *7cm

Electronic Unit Injector Nozzle Nut Type: High Pressure Common Rail Electronic Unit Injector Nozzle Nut

Electronic Unit Injector Nozzle Nut MOQ: 1pcs

1.5. 7207-0094 Electronic Unit Injector Nozzle Nut Quality Control

(1) Electronic Unit Injector Nozzle Nut Testing

All electronic unit injector nozzle nut spare parts are tested for electrical characteristics, accuracy, high temperature, low temperature, withstand voltage, leakage, durability, and various working conditions.

(2) Electronic Unit Injector Nozzle Nut Assembling

For the quality control of electronic unit injector nozzle nut production and installation, our company

strictly conducts installation per the standard installation parameters and procedures, covering the stroke test and fatigue spring test of the electronic unit injector nozzle nut.

(3) Electronic Unit Injector Nozzle Nut Inspection

The factory inspection of the electronic unit injector nozzle nut is undergone full inspection, random inspection, and batch inspection three inspections. Different brands of test benches are used to test the same electronic unit injector nozzle nut for more than three times for factory inspection, and the electronic unit injector nozzle nut installation testing environment are progressed in dust-free workshop.

1.6. 7207-0094 Electronic Unit Injector Nozzle Nut Customized Service

(1) Electronic Unit Injector Nozzle Nut Customized Service: Meet the customized needs of OEM manufacturers for shell lettering, logo engraving, electronic unit injector nozzle nut internal packaging, electronic unit injector nozzle nut external packaging and labels customized, etc.

	
Electronic Unit Injector Nozzle Nut Packaging	Color Customization: Gray, Black, White

(2) Electronic Unit Injector Nozzle Nut Customized Service Requirements:

The purchased of customized electronic unit injector nozzle nut are not less than **10 pieces**.

Customized electronic unit injector nozzle nut packages no less than **1000 pieces**.

When the customized products involve the need of specify logo, the OEM manufacturer needs to provide trademark authorization and the sample of logo image file.

⚠ **Once the customized electronic unit injector nozzle nut is sold, it cannot be returned or exchanged if there is no quality problems.**

1.9. 7207-0094 Electronic Unit Injector Nozzle Nut Warranty Instructions

(1) Product Warranty Conditions and Instructions

It is necessary to provide pictures, videos, or test reports detected by the electronic unit injector nozzle nut inspection equipment when the electronic unit injector nozzle nut is abnormal during use as evidence to feed back to the salesman.

Abnormal conditions are properly explained such as: 1.Smoke, 2. Engine shake, 3. Difficulty starting the engine, 4. Engine noise, 5. oil leakage etc.

(2) Electronic Unit Injector Nozzle Nut Warranty Coverage

Within 15 days after customer receives the 7207-0094 injector, if there is a performance failure and the product has no appearance damage, customer can choose to replace it or repair it;

If the 7207-0094 electronic unit injector nozzle nut has performance problems during the warranty period (6-12 months), and it is confirmed that it is product's problems after testing, you can contact our

salesmen to replace the same model or a reworked product with the same performance for free;

If the electronic unit injector nozzle nut house has obvious scratches, it can only be repaired and it will be returned as it is if the product is confirmed to be fault-free.

⚠ Tips: For products not covered by warranty, our company can provide paid maintenance services. For products after paid repaired, the same performance problem will have a free warranty period within 3 months from the date of repairing.

(3) Electronic Unit Injector Nozzle Nut Out of Warranty Coverage

- ① The warranty period has expired and is not covered.
- ② Electronic unit injector nozzle nut failure caused by high temperature, high pressure, humidity, rain, snow, saline-alkali soil, earthquakes, or abnormal environments.
- ③ Electronic unit injector nozzle nut damage caused by unauthorized disassembly or repair by the customer.
- ④ Electronic unit injector nozzle nut damage caused by human error (dropping, magnetization by a strong magnetic field, arson).
- ⑤ Electronic unit injector nozzle nut failure or damage caused by issues other than the injector electronic unit injector nozzle nut's design, technology, manufacturing, or quality.
- ⑥ Electronic unit injector nozzle nut failure caused by system pressure exceeding the approved system pressure.
- ⑦ Electronic unit injector nozzle nut failure caused by system voltage exceeding the approved voltage.
- ⑧ Electronic unit injector nozzle nut failure caused by impurities (water, lead, aluminum powder, iron powder, sulfide) in the system fuel exceeding the standard requirements.
- ⑨ Electronic unit injector nozzle nut failure caused by installation not following the tightening torque specified in the vehicle's engine maintenance manual (excessive or insufficient tightening torque).
- ⑩ Electronic unit injector nozzle nut failure due to failure to adhere to the installation angle specified in the vehicle engine maintenance manual.
- 11 Failure to adhere to the cleaning requirements specified in the vehicle engine maintenance manual.
- 12 Failure to follow the replacement requirements for wearing parts specified in the vehicle engine maintenance manual.
- 13 Failure to adhere to the intake and exhaust system clearance requirements specified in the vehicle engine maintenance manual.
- 14 Failure to follow the replacement requirements for wearing parts in the oil system and the clearances between the oil intake system piping and the electronic unit injector nozzle nut.

2.1. 7207-0094 Electronic Unit Injector Nozzle Nut Installation Utilized Location

E.g.: See the electronic unit injector nozzle nut utilized location as follows:

No.	Name
A	Electronic Unit Injector Nozzle Nut

2.2. 7207-0094 Electronic Unit Injector Nozzle Nut Installation

(1) 7207-0094 Electronic Unit Injector Nozzle Nut Installation Precautions:

- ① The replacement of the electronic unit injector nozzle nut must strictly follow the electrical system, the approved pressure of the low-pressure fuel intake system, the approved pressure of the high-pressure fuel circuit system, and fuel system replacement consumables requirements (including the low-pressure fuel circuit system filter and the high-pressure fuel circuit) specified in the vehicle engine maintenance manual.
- ② Replacement of wearing parts of the fuel system, cleaning requirements for the connection between the fuel system and the electronic unit injector nozzle nut, the fitting clearance of the electronic unit injector nozzle nut connection, the installation angle and tightening torque of the electronic unit injector nozzle nut, the fitting clearance of the intake system, and the fitting clearance of the exhaust system to ensure the service life of the engine and the normal operation of the electronic unit injector nozzle nut.
- ③ When installing the electronic unit injector nozzle nut on the engine, it is necessary to clean the engine block, cylinder head and other parts connected to the electronic unit injector nozzle nut, and ensure that there is no dust, carbon deposits, water, rust spots, etc.
- ④ When installing the electronic unit injector nozzle nut on the engine, please carefully check the components related to the installation of the electronic unit injector nozzle nut, such as the electronic unit injector nozzle nut pressure plate, screw, electronic unit injector nozzle nut rod and other accessories are not deformed, and install it in strict accordance with the operation steps of the engine maintenance manual.
- ⑤ Without replacing new washer shim can lead to: deformation of the tight cap of nozzle, deformation of nozzle, deformation of nozzle orifice, oil leakage and air leakage, which will cause serious damage to the injector nut and nozzle to break and cause damage to the engine.

⑥ It is forbidden to operate the bare electronic unit injector nozzle nut for a long time in an environment with serious dust pollution and corrosion to iron products.

⑦ It is forbidden to operate the bare electronic unit injector nozzle nut for a long time in a strong magnetic field environment.

(2) 7207-0094 Electronic Unit Injector Nozzle Nut Tightening Torque

When installing the electronic unit injector nozzle nut, the torque wrench and tightening torque data requirement must follow the injector maintenance manual. (70Nm) .

⚠ The electronic unit injector nozzle nut tightening torque must be installed according to the tightening torque specified in the injector maintenance manual.

2.3. 7207-0094 Electronic Unit Injector Nozzle Nut Not Working Normally

- (1) There is air in the oil circuit of the engine fuel system.
- (2) Vehicle electronic unit injector nozzle nut's oil supply system is not normal.
- (3) Engine common rail system oil leakage or pressure limiting valve damage.
- (4) There is a short circuit, cutting out and poor contact in the wiring harness connected to the electronic unit injector nozzle nut of the vehicle.
- (5) The long-term placement of the electronic unit injector nozzle nut causes the anti-rust oil to solidify, and the internal components are stuck or the oil holes are blocked.

⚠ Before installing, carefully check whether other components in the common rail system except the electronic unit injector nozzle nut are damaged to prevent the electronic unit injector nozzle nut from not working properly after being replaced.

2.4. 7207-0094 Electronic Unit Injector Nozzle Nut Causes of Being Damaged

- (1) Didn't operate properly according to engine maintenance manual during disassembly or installation, resulting in damage to the electronic unit injector nozzle nut.
- (2) The fuel oil used for the vehicle does not meet the standard cause damage to the electronic unit injector nozzle nut, such as: the water content in the fuel oil exceeds the standard, iron powder, aluminum powder, sulfide impurities exceed the standard, etc.
- (3) The engine is not regularly maintained according to the engine maintenance manual (please refer to the vehicle maintenance manual for the maintenance mileage). For example, failure to replace the lubricating oil of the engine system for a long time will cause abnormal wear of the engine, excessive

exhaust gas volume or a large amount of carbon deposits inside the engine. The filter is not replaced during maintenance or the replaced filter cannot reach the original filter standard. all above reasons can cause damage to the electronic unit injector nozzle nut.

- (4) The abrasion of the electronic unit injector nozzle nut produces iron powder and aluminum powder enter the electronic unit injector nozzle nut and cause damage to the electronic unit injector nozzle nut.
- (5) The deformation and abrasion of fuel tank result in iron powder or aluminum powder entering the electronic unit injector nozzle nut and causing damage to the electronic unit injector nozzle nut.
- (6) The electronic unit injector nozzle nut is damaged due to replacement or adjustment of the relevant parts of the electronic unit injector nozzle nut. For example, the valve clearance does not meet the standard after the engine is repaired, the replacement or modification of the wiring harness connected to the electronic unit injector nozzle nut fails to meet the original standard.
- (7) The engine is overheated and overloaded for a long-time working result in damage to the electronic unit injector nozzle nut.
- (8) The electronic unit injector nozzle nut will be damaged naturally at the end of its working life.
- (9) The electronic unit injector nozzle nut is magnetized (electronic unit injector nozzle nut parts' magnetic exceeded) causing the electronic unit injector nozzle nut to not work properly.

⚠ Before replacing the electronic unit injector nozzle nut, please check the engine parts carefully according to the engine maintenance manual to avoid the electronic unit injector nozzle nut being damaged again after replacement.

3. 7207-0094 Electronic Unit Injector Nozzle Nut Purchase and Delivery

3.1. 7207-0094 Electronic Unit Injector Nozzle Nut Purchase Payment Term

Payment Terms: T/T, PayPal, Alipay, WeChat

⚠ Please contact our salesmen for specific payment information.

3.2. 7207-0094 Electronic Unit Injector Nozzle Nut Main Sales Markets

Electronic unit injector nozzle nut main sales markets: Asia, Europe, North America, South America, Africa etc.

3.3. 7207-0094 Electronic Unit Injector Nozzle Nut Declaration Requirements

Shumatt can assist customers to provide the following documents for import customs clearance: contract, invoice, packing list, bill of lading, insurance policy, certificate of origin, etc.

3.4. 7207-0094 Electronic Unit Injector Nozzle Nut Shipping Ways

Destination in China areas: SF Express, Debon Express, the corresponding logistics company can be provided according to customer requirements in special cases.

Destinations out of China's areas: DHL, UPS, FedEx, TNT air, ocean or other shipping methods required by customers.

3.5. 7207-0094 Electronic Unit Injector Nozzle Nut Lead time

Lead time: Send out within 3 – 7 working days after receiving payment (Except for special products and special cases) .

3.7. 7207-0094 Electronic Unit Injector Nozzle Nut Packing

Domestic express packaging: Usually wrapped in waterproof scotch tape, such as picture No.1.

International express packaging: Wrapped with waterproof yellow tape After wrapping the black protective film, such as picture No. 2.

Pallet Shipping: Use fumigation free and recycling trays that meet export requirements, and use white wrapping protective film to wrap and bind with cable ties for the outside, such as picture No. 3, also, the products can be packaged according to customers' requirements.

⚠ The packing tray is made of plastic and can be recycled.

⚠ Transparent tape, yellow tape, black wrapping protective film, white wrapping protective film are non-degradable materials, please dispose of them properly.

⚠ Minors are prohibited from using transparent tape, yellow tape, black wrapping protective film, and white wrapping protective film to avoid personal injury.

4. 7207-0094 Electronic Unit Injector Nozzle Nut Storage Standard

(1) Choose a suitable storage place

The warehouse and cargo yard where the electronic unit injector nozzle nut is stored should be kept clean and dry, and away from the factory buildings that generate harmful gases and dust; do not mix with

acids, alkali, salts and other substances; the storage place should have a good drainage system; the cargo yard should be flattened with gravel or furnace ash etc. to enhance the water permeability of the surface layer to keep the reservoir area dry.

(2) Strict requirements of warehousing

Strict inspections should be carried out when the electronic unit injector nozzle nut are put into storage, the surface cleaning work should be done well to remove water traces, oil stains, ash and other dirt, remove the rust and do anti-rust treatment in time. Packaged injectors must be protected from damage.

(3) Keep the warehouse dry and preventing moisture

The relative humidity is usually below 70% for the electronic unit injector nozzle nut placed in the room, and the corrosion of the electronic unit injector nozzle nut are significantly reduced.

Electronic unit injector nozzle nut must be stored in the warehouse, and they are forbidden to store in the same warehouse with commodities with high water content.

(4) Stack Properly

After the electronic unit injector nozzle nut is exposed to rain, the corrosion rate will increase significantly. The purpose of sealing is to isolate the electronic unit injector nozzle nut from rainwater and humid air, so the warehouse window should be checked in time to avoid rainwater entering the warehouse

If the electronic unit injector nozzle nut package is damaged, it should be repaired or replaced; when the package is damp, the packaging material should be dried; if the original anti-corrosion and oil applied at the factory is found to be damaged or dried up, it should be cleaned and re-applied oil in time.

⚠ It is forbidden to leave the electronic unit injector nozzle nut exposed in the air for a long time.

⚠ It is forbidden to store acid, alkali, salt and other substances together with the electronic unit injector nozzle nut.

⚠ The unpacked electronic unit injector nozzle nut must be rust-proof during secondary storage.
